### **Seminars:**

We offer throughout the year a series of professional seminars free of charge to our members presented by experts on topics in both dental and legal fields for the education of our members. These seminars are designed to keep you our member well informed on relevant risk management situations. Advise that each member can use in his day-to-day practice.

### **Communications:**

Our Web Based Management System (WBMS) is state of the art and allows you as members almost immediate contact with our organization. Our website [www.cdpa.com](http://www.cdpa.com) contains relevant information regarding seminars, upcoming events and interesting and informative risk management situations and advice.

In an effort to keep members informed about urgent and important matters we have the capabilities through out E-Bulletin to reach out to our membership very quickly via electronic media.

Our quarterly E-Letter will give members detailed accounts of situations where risk management advice has been utilized and articles from our panel of lawyers on significant legal matters.

### **Risk Management Assistance:**

Our most prized asset is the ability to respond to our members concerns promptly. As we are not bound by a contract there are no papers and forms to fill out prior to you receiving Risk Management Assistance. If we can assist you before a situation escalates we may be able to control an unpleasant incident and alleviate your concerns. This will save our members considerable anguish. If a situation evolves into a “college complaint” or an insurance investigation and you are eligible for assistance we will assign a lawyer and there is NO cost to you.
